

Carbon Statement

Fife Contemporary (FC) is committed to working in an environmentally sustainable way, and supporting artists and partners to do the same. We do this by measuring our carbon emissions, reducing waste, and recycling resources. By implementing best practice, we hope to influence our partners, other organisations, artists and audiences.

In order to do this, we:

- measure and report our carbon emissions yearly, and have committed to reducing our emissions year on year;
- have a detailed environmental policy which is reviewed regularly;
- have identified a green champion who communicates with all staff members;
- have embedded our commitment to sustainability across all our programme;
- are committed to sharing our commitment and practice with artists and other organisations;
- have adopted a travel policy to reduce travel emissions.
